WEBSITES · APPS · BUSINESS SYSTEMS · AUTOMATION

Tell us what slows your business down. We build the software that fixes it.

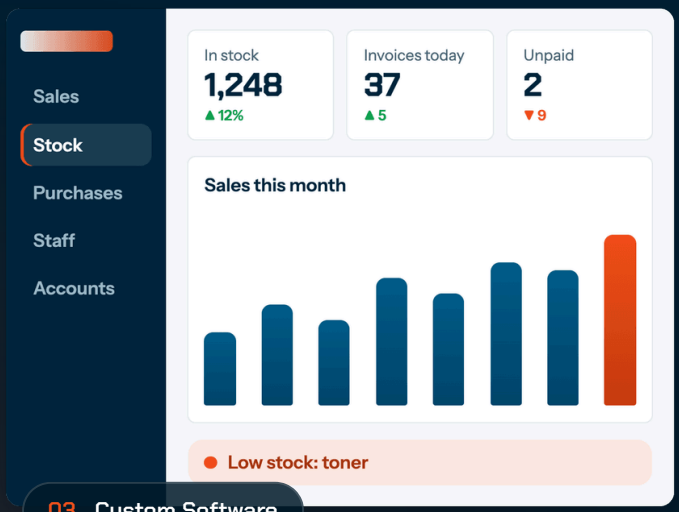

No tech words needed. Here are four everyday business headaches, and what our in-house software team builds to make each one go away.

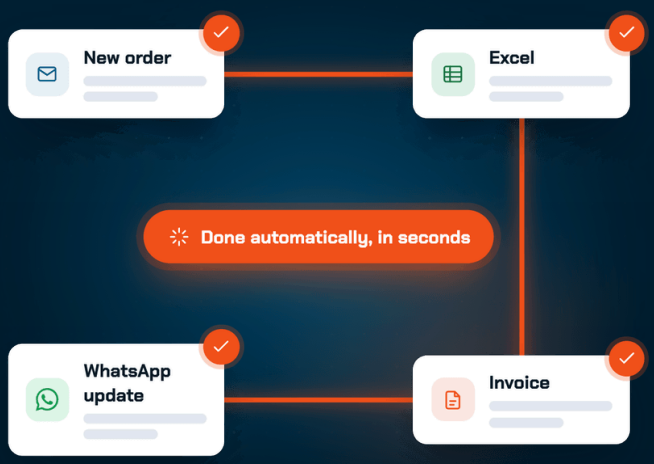

01 Website Design

02 Mobile App Design

03 Custom Software

04 Less Manual Work

00 START HERE

Four everyday business headaches, and the software that makes each one go away.

01 WEBSITE DESIGN
People search Google and find your competitors, but not you?! p. 3

02 MOBILE APP DESIGN
Customers can only reach you by phone, and only during working hours?! p. 4

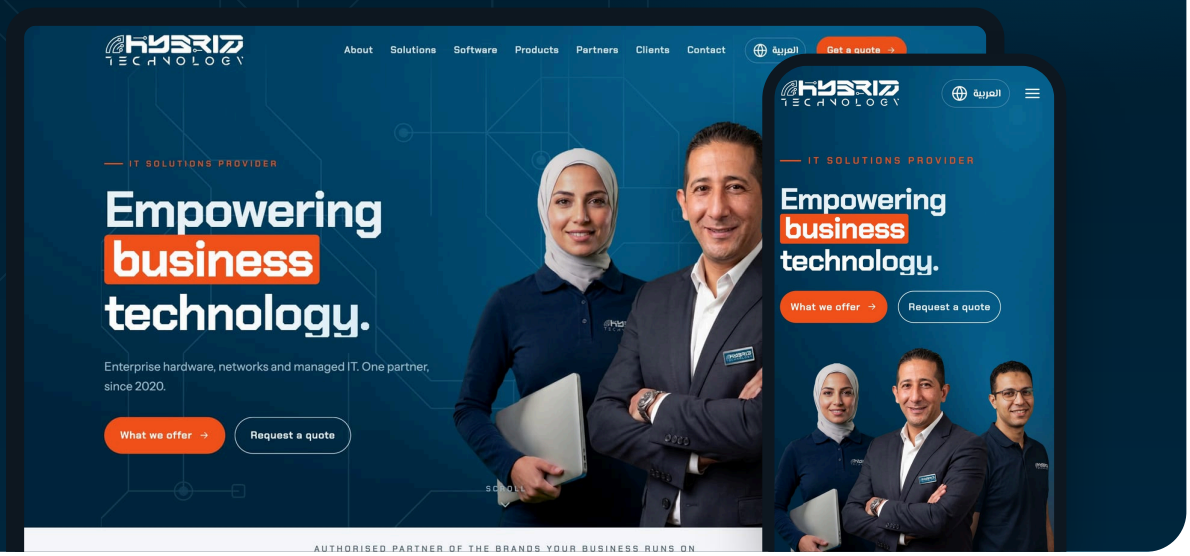

03 CUSTOM SOFTWARE
Your business still runs on Excel sheets, paper and people's memory?! p. 5

04 LESS MANUAL WORK
Your team keeps typing the same information again and again?! p. 6

PROOF, NOT PROMISES

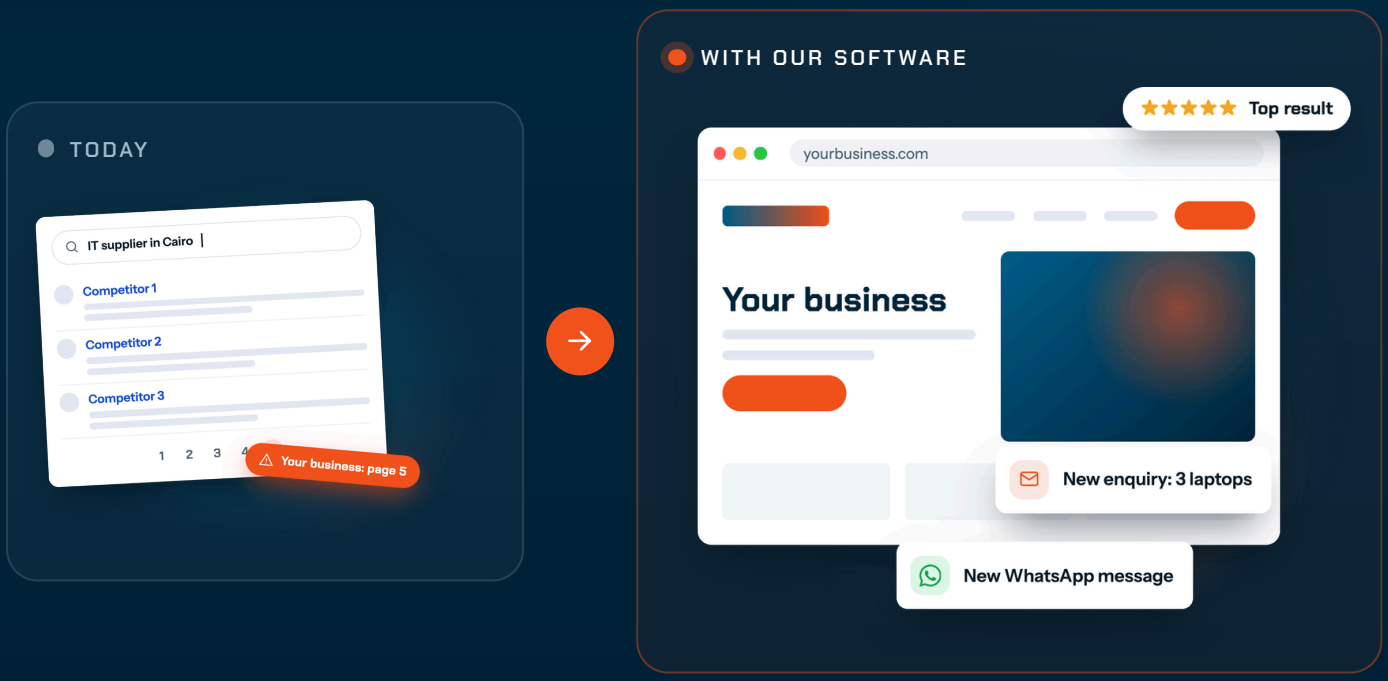

You're looking at our work.

hybridtech-eg.com was designed and built by our own team: Arabic and English, made for phones first, quick to load, and with a simple product manager the sales team updates from their phone. No developer needed.

People search Google and find your competitors, but not you?!

Most buyers look you up on Google before they call. If you have no website, or an old one that looks untrustworthy on a phone, they quietly choose someone else, and you never find out you lost them.

✓ WHAT WE BUILD FOR YOU

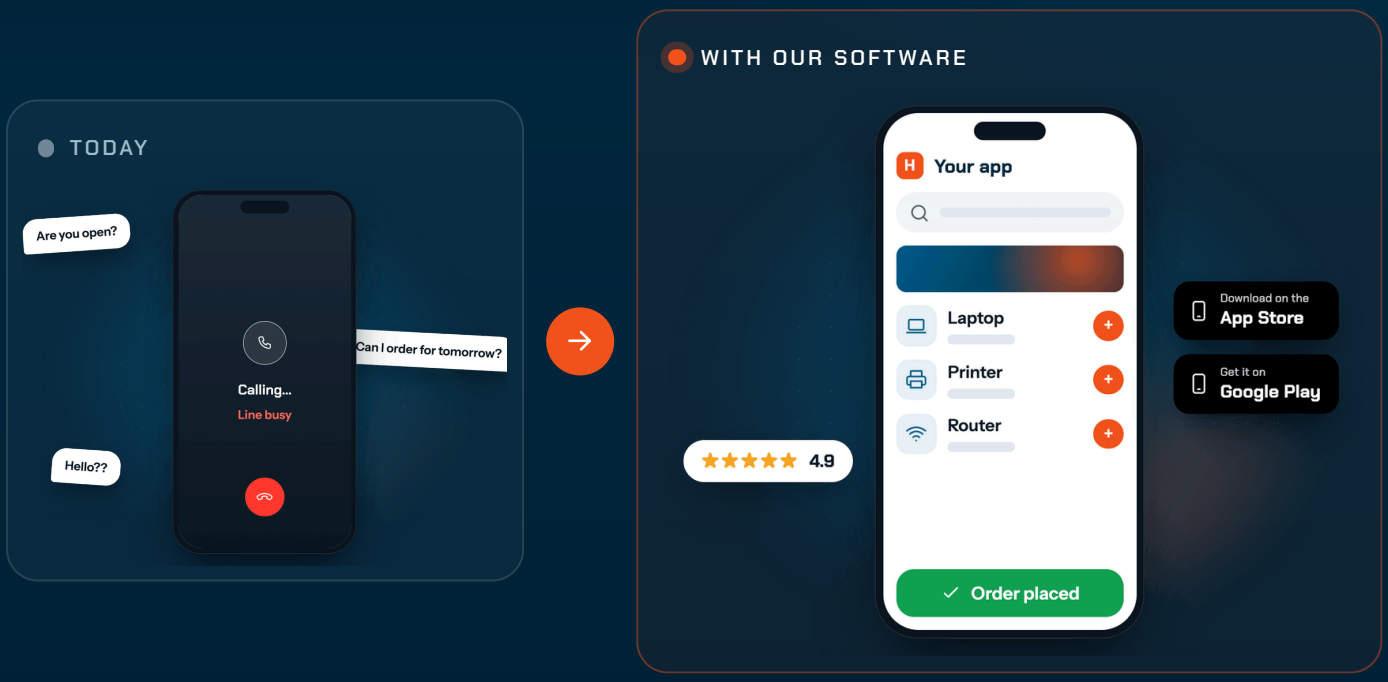

A professional website that brings in customers

A fast, modern website in Arabic and English that shows up on Google, looks great on any phone, and turns visitors into calls, WhatsApp messages and orders.

- ✓ Found on Google
- ✓ Enquiries 24/7
- ✓ Looks trustworthy

Customers can only reach you by phone, and only during working hours?!

Orders, bookings and questions all arrive as calls and messages. Lines are busy, messages get missed, and every request waits for someone to be free to answer.

✓ WHAT WE BUILD FOR YOU

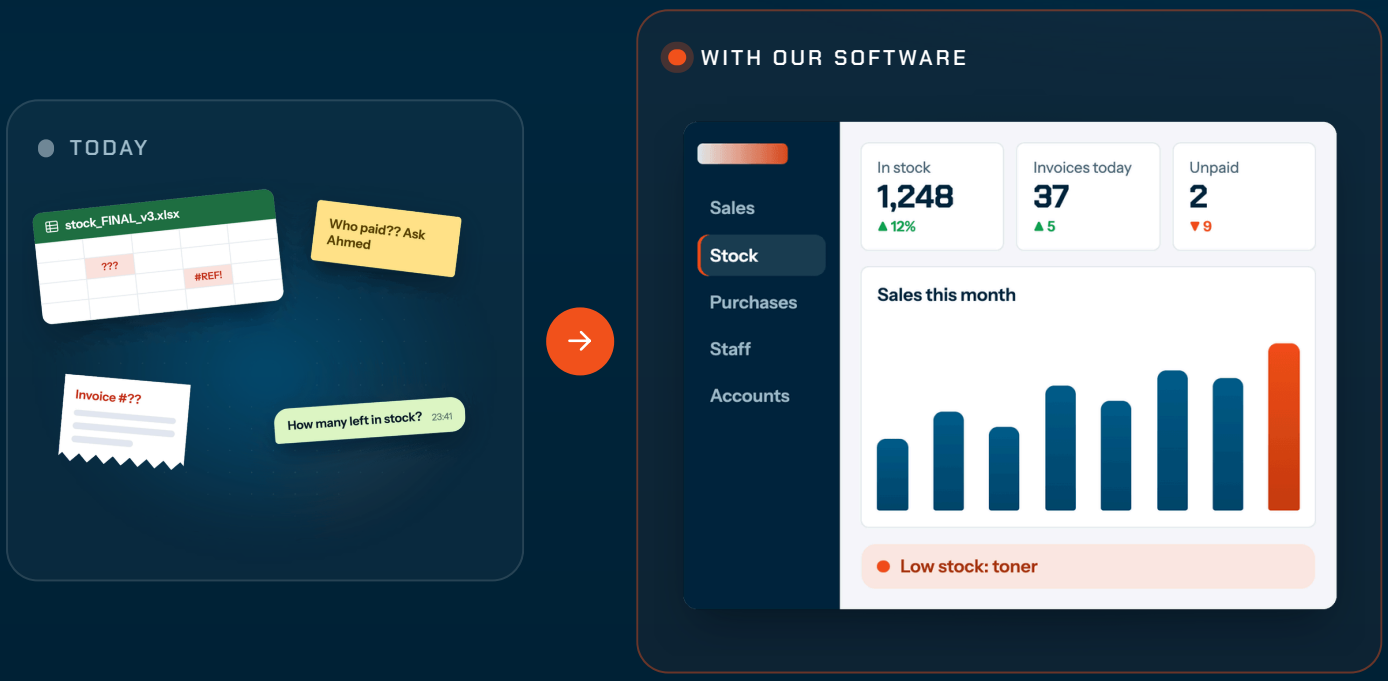

Your own app on iPhone and Android

An app with your name and logo that customers download from the App Store or Google Play. They order, book, pay and track by themselves, any time, and you get notified instantly.

- ✓ Orders while you sleep
- ✓ Fewer calls
- ✓ Customers come back

Your business still runs on Excel sheets, paper and people's memory?!

Stock lives in one spreadsheet, invoices in another, salaries on paper, and the real numbers in one person's head. Simple questions like "how much stock do we have?" or "who hasn't paid us?" take hours, and mistakes cost money.

✓ WHAT WE BUILD FOR YOU

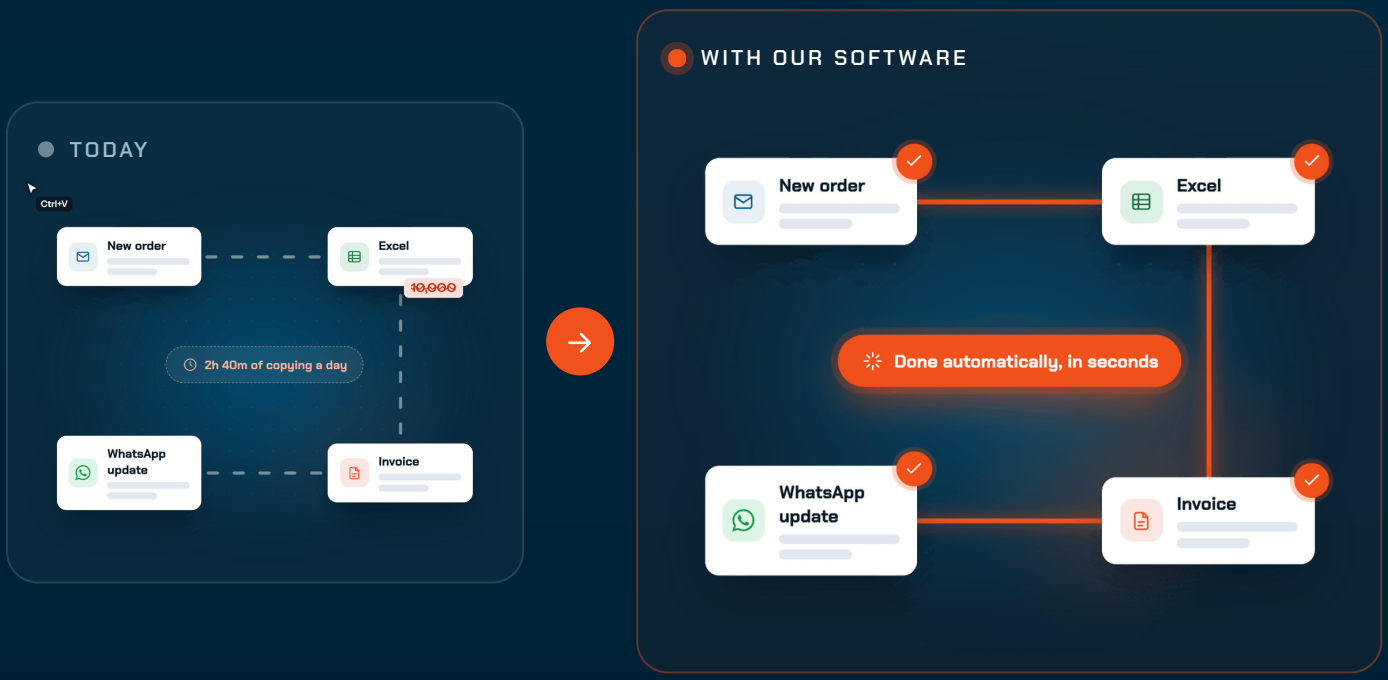

One system that runs your whole business

Sales, stock, purchases, staff and accounts in one program, built around the way you already work. This is what people call an ERP. You open one screen and see everything, live.

- ✓ Live stock levels
- ✓ Invoices in one click
- ✓ Reports any time

Your team keeps typing the same information again and again?!

An order arrives by email. Someone copies it into Excel, retypes it into an invoice, then sends a WhatsApp update. Hours of copy-and-paste every day, and one wrong digit causes a real problem.

✓ WHAT WE BUILD FOR YOU

Software that does the repetitive work for you

We connect the programs you already use (email, WhatsApp, Excel, your accounting software) so information moves between them by itself. This is what people call automation and integration. Your team stops copying and gets back to real work.

- ✓ Hours saved every day
- ✓ No typing mistakes
- ✓ Instant updates

Not sure what you need? Just describe the problem.

Tell us how things work today and what frustrates you. We'll explain the options in plain words and send you a clear quote.

01 **Listen**
We learn how your business works today.

02 **Design**
You see and approve the screens first.

03 **Build**
Regular demos. No surprises.

04 **Launch & support**
We set it up, train your team and stay with you.

EVERY PROJECT INCLUDES

- Arabic and English
- Works on phones, tablets and computers
- You approve the screens before we build
- Regular demos, no surprises
- Training for your team
- Support after launch

WHY BUILD IT WITH HYBRID TECHNOLOGY

One partner for your IT and your software
The team that runs your devices and network builds the system that runs on them.

Plain words, clear quotes
No jargon. You know what you get, what it costs and when, before we start.

Made in Cairo, in Arabic and English
Built for how business works in Egypt, for your staff and your customers.

06 GET A SOFTWARE QUOTE

Describe the problem. We'll quote the fix.

Tell us how things work today and what frustrates you. We reply in plain words with the options and a clear quote.
